PROFESSIONAL SUMMARY

Software Engineering graduate from Jordan University of Science and Technology (JUST), with hands-on experience developing web and backend applications using **JavaScript, Node.js, Express.js, and MySQL**. Strong foundation in **RESTful APIs, MVC architecture, database design, software testing, and object-oriented programming**. Developed multiple software projects, including **Ordera**, a restaurant ordering and call center management system. Strong problem-solving and analytical skills with a strong interest in backend and full-stack software development. Seeking a **Software Engineering, Backend, or Full-Stack Internship** to apply technical skills and gain professional industry experience.

TECHNICAL SKILLS

Programming: JavaScript, Java, Python, C++

Backend & Web: Node.js, Express.js, RESTful APIs, HTML5, CSS3, Bootstrap, jQuery

Databases: MySQL, MySQL Workbench, PostgreSQL

Software Engineering: MVC Architecture, Object-Oriented Programming, Software Testing, Agile, Database Design

Tools: Git, GitHub, Visual Studio Code

PROJECT EXPERIENCE

Ordera – Restaurant Ordering & Call Center System

- Developed a full-stack restaurant management system for **customer ordering, product management, order management, administration, and call center operations**.
- Built backend functionality using **Node.js and Express.js** following an MVC architecture.
- Designed and integrated **RESTful APIs** for products and orders.
- Implemented database operations using **MySQL**.

- Developed functionality for managing products, orders, and order statuses.
- Structured the application into **Controllers, Services, Routes, Models, Views, and Database** components.
- Used Git and GitHub for source-code management and project development.

E-Commerce Web Application

- Developed a full-stack e-commerce web application using **Node.js, Express.js, and MySQL**.
- Implemented product management, shopping cart, user authentication, and order management features.
- Designed backend functionality and database interactions to support core application workflows.
- Applied software engineering principles to organize and maintain application components.

Admin Dashboard System

- Developed an administrative dashboard for managing users, products, orders, and reports.
- Implemented features for managing application data and administrative workflows.
- Designed functionality to support efficient management of business operations.

Rating & Review System

- Designed and implemented a rating and review feature connecting users with products.
- Developed functionality for storing and managing user feedback and product ratings.
- Worked with database operations to connect users, products, and reviews.

EDUCATION

B.Sc. in Software Engineering
Jordan University of Science and Technology (JUST)
Graduated: January 2026 | GPA: 2.90 / 4.00

CERTIFICATIONS & TRAINING

- **Node.js & Express.js Course**
- **The Complete Full-Stack Web Development Bootcamp** — Udemy
- **Quality Assurance (QA) Course**
- **CCNA: Introduction to Networks** — Cisco Networking Academy
- **Agile Project Management and Agile Excellence**

- **Complete Front-End Development** — HTML5, CSS3, Bootstrap, JavaScript & jQuery

RELEVANT COURSEWORK

Data Structures, Object-Oriented Programming, Database Systems, Software Testing, Software Architecture Design, Project Management
